## GETTING START WITH CATAROB

### 1.1 What?

**Catarob** is a GUI granulometric analysis from images based on segmentation.

### 1.2 Why?

Following a need to perform the knowledge of the Rhone (river) bed. A catamaran-teleoperated has been acquired. It consists of reflex camera.

### 1.3 Summary

**Catarob** is a python package coming up with grain size from image at large. It split in 3 sub-packages : `#. core` : the core functions of the package `#. gui` : the graphical user interface which use core functions `#. lib` : several functions useful for the core sub-package

### 1.4 Build instructions (Linux)

Compilation is ensured by Python distutils tools.

You will need the following tools :

- Python version 2.7 or later with the distutils package.
- Python library matplotlib, numpy, scipy, pymorph, mamba image

---

#### Todo

Add setup.py and configure it

---

### 1.5 Authors, Copyright & License

Copyright 2013, Pegot-Ogier Thomas <[thomas.pegot@gmail.com](mailto:thomas.pegot@gmail.com)>

Analyz is ruled by the **GPL v3 License Terms**:

## CATAROB PACKAGE

### 2.1 Subpackages

#### 2.1.1 catarob.core package

##### Submodules

##### catarob.core.base module

Created on 22 août 2013

@author: thomas

**class** catarob.core.base.**AutoSlots**

Bases: type

Define slot in each class (earn memory)

catarob.core.base.**auto\_adapt\_to\_methods** (*decorator*)

catarob.core.base.**opened** (*\*args, \*\*kws*)

catarob.core.base.**opened\_w\_error** (*\*args, \*\*kws*)

catarob.core.base.**singleton** (*cls*)

catarob.core.base.**stdout\_redirected** (*\*args, \*\*kws*)

catarob.core.base.**typedef\_control** (*\*args, \*\*kwargs*)

Check paramters' type of each input of function

catarob.core.base.**working\_directory** (*\*args, \*\*kws*)

##### catarob.core.correction module

Created on 31 août 2013

@author: thomas

**class** catarob.core.correction.**Correction**

Bases: object

##### catarob.core.filtering module

**class** catarob.core.filtering.**Filtering** (*spatial\_radius=None, range\_radius=None*)

Bases: object

Segmenter class using the mean shift GPU OpenCV to segment image Example:

```
import cv2
from gpumeanshift import filter
I = cv2.imread("path/to/image", cv2.CV_IMREAD_COLOR)
A = filter(I, 12, 12, 1)
```

**range\_radius** None

Range radius of the search window

**spatial\_radius** None

Spatial radius of the search window

## catarob.core.fitting module

Created on 31 août 2013

@author: thomas

**class** catarob.core.fitting.**Fitting**

Bases: object

## catarob.core.preprocessing module

Created on 17 août 2013

**class** catarob.core.preprocessing.**Preprocessing**

Bases: object

**static** **cv\_resize** (*image*, *size\_choice*=None)

Resize an iplimage

**Parameters** **size\_choice** (*iplimage CV\_8UC3*) – “694x462” or “1392x924” or None

**Returns** image resized

**Return type** same as size\_choice

**static** **extraction\_laser** (*image*, *disp*=False)

Extraction des laser en image de label

**static** **find\_height** (\*args\_, \*\*kwargs\_)

**static** **read\_metadata** (*path*)

Pick model, focal and zoom data from Exif data of picture.

**Parameters** **path** (*str*) – full picture path

**Returns** model, focal, zoom

**Return type** tuple

## catarob.core.segmentation module

Created on 31 août 2013

@author: thomas

**class** catarob.core.segmentation.**Segmentation**

Bases: object

## Module contents

### core (catarob.core)

Sub-package for objects used in core.

As listed below, this sub-package contains image processing functions and classes.

### Core Classes

## 2.1.2 catarob.gui package

### Submodules

#### catarob.gui.Ui\_mainwindow module

```
class catarob.gui.Ui_mainwindow.Ui_MainWindow
    Bases: object
    retranslateUi (MainWindow)
    setupUi (MainWindow)
```

#### catarob.gui.icones\_rc module

```
catarob.gui.icones_rc.qCleanupResources ()
catarob.gui.icones_rc.qInitResources ()
```

#### catarob.gui.main module

Module implementing MainWindow.

```
class catarob.gui.main.MainWindow (parent=None)
    Bases: PyQt4.QtGui.QMainWindow, catarob.gui.Ui_mainwindow.Ui_MainWindow
    Class documentation goes here.
```

#### catarob.gui.mainwindow module

Module implementing MainWindow.

```
class catarob.gui.mainwindow.MainWindow (parent=None)
    Bases: PyQt4.QtGui.QMainWindow, catarob.gui.Ui_mainwindow.Ui_MainWindow,
    catarob.core.preprocessing.Preprocessing
    Class documentation goes here.
    alloc_attr ()
    on_FilterButton_clicked ()
    on_OpenButton_clicked ()
        Slot documentation goes here.
    on_RegisterButton_clicked ()
    on_actionHelp_2_triggered ()
        Slot documentation goes here.
```

```

on_actionQuit_triggered()
    Slot documentation goes here.

on_actionRun_all_2_triggered()
    Slot documentation goes here.

on_actionRun_all_triggered()
    Slot documentation goes here.

on_actionSave_current_image_2_triggered()

on_actionSave_current_image_triggered()
    Slot documentation goes here.

on_actionStop_triggered()
    Slot documentation goes here.

on_actionView_statistics_triggered()
    Slot documentation goes here.

show_curr_image()

show_curr_metadata()

update()
    Call class and 4update image, and window

```

### catarob.gui.menumanager module

```

class catarob.gui.menumanager.MenuManager (parent=None)
    Bases: PyQt4.QtGui.QMainWindow

    load_file (path=None)

class catarob.gui.menumanager.OpenCVQImage (opencvBgrImg)
    Bases: PyQt4.QtGui.QImage

```

### catarob.gui.progressbar module

```

class catarob.gui.progressbar.MyAppli (parent=None)
    Bases: PyQt4.QtGui.QWidget

    incProgress()
        Increment the progress dialog

    on_btnStart_clicked()
        Start the treatment in the thread

class catarob.gui.progressbar.MyThread (parent)
    Bases: PyQt4.QtCore.QThread

    cancel()
        SLOT to cancel treatment

    run()

catarob.gui.progressbar.bin (QTextStream) → QTextStream
catarob.gui.progressbar.hex (QTextStream) → QTextStream
catarob.gui.progressbar.oct (QTextStream) → QTextStream

```

## catarob.gui.termstream module

```
class catarob.gui.termstream.TermStream
    Bases: PyQt4.QtCore.QObject
    fileno()
    flush()
    messageWritten None
    static stderr()
    static stdout()
    write(msg)
```

## Module contents

“

**core (catarob.gui)**

Sub-package for objects used in gui.

As listed below, this sub-package contains Qt GUI derived classe.

## Core Classes

## 2.1.3 catarob.lib package

### Submodules

#### catarob.lib.cvnumpy module

Created on 18 août 2013

@author: thomas

catarob.lib.cvnumpy.**array2cv** (*a*)

catarob.lib.cvnumpy.**cv2array** (*im*)

## Module contents

## 2.2 Module contents

### 2.2.1 catarob

#### Provides

1. An array object of arbitrary homogeneous items
2. Fast image processing over arrays
3. Qt Gui interface

### How to use the documentation

We recommend exploring the docstrings using [IPython](#), an advanced Python shell with TAB-completion and introspection capabilities. See below for further instructions.

The docstring examples assume that *catarob* has been imported as *cb*:

```
>>> import catarob as cb
```

Use the built-in `help` function to view a function's docstring:

```
>>> help(cb)
...
```

### Available subpackages

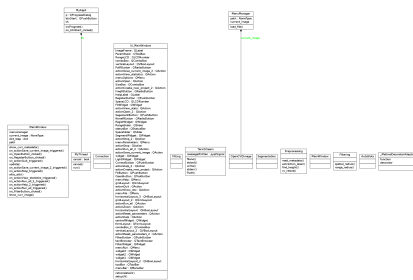

**core** Core functions used by gui

**lib** Basic functions used by several sub-packages.

**gui** Graphical interface that use core functions

..uml:: { {/home/thomas/workspace/catarob/catarob/} }

## INDICES AND TABLES

- *genindex*
- *modindex*
- *search*

**C**

- catarob, 9
- catarob.core, 7
  - catarob.core.base, 5
  - catarob.core.correction, 5
  - catarob.core.filtering, 5
  - catarob.core.fitting, 6
  - catarob.core.preprocessing, 6
  - catarob.core.segmentation, 6
- catarob.gui, 9
  - catarob.gui.icones\_rc, 7
  - catarob.gui.main, 7
  - catarob.gui.mainwindow, 7
  - catarob.gui.menumanager, 8
  - catarob.gui.progressbar, 8
  - catarob.gui.termstream, 9
  - catarob.gui.Ui\_mainwindow, 7
- catarob.lib, 9
  - catarob.lib.cvnumpy, 9

**p**

- preprocessing (*Unix*), 6

**A**

alloc\_attr() (catarob.gui.mainwindow.MainWindow method), 7  
 array2cv() (in module catarob.lib.cvnumpy), 9  
 auto\_adapt\_to\_methods() (in module catarob.core.base), 5  
 AutoSlots (class in catarob.core.base), 5

**B**

bin() (in module catarob.gui.progressbar), 8

**C**

cancel() (catarob.gui.progressbar.MyThread method), 8  
 catarob (module), 9  
 catarob.core (module), 7  
 catarob.core.base (module), 5  
 catarob.core.correction (module), 5  
 catarob.core.filtering (module), 5  
 catarob.core.fitting (module), 6  
 catarob.core.preprocessing (module), 6  
 catarob.core.segmentation (module), 6  
 catarob.gui (module), 9  
 catarob.gui.icones\_rc (module), 7  
 catarob.gui.main (module), 7  
 catarob.gui.mainwindow (module), 7  
 catarob.gui.menumanager (module), 8  
 catarob.gui.progressbar (module), 8  
 catarob.gui.termstream (module), 9  
 catarob.gui.Ui\_mainwindow (module), 7  
 catarob.lib (module), 9  
 catarob.lib.cvnumpy (module), 9  
 Correction (class in catarob.core.correction), 5  
 cv2array() (in module catarob.lib.cvnumpy), 9  
 cv\_resize() (catarob.core.preprocessing.Preprocessing static method), 6

**E**

extraction\_laser() (catarob.core.preprocessing.Preprocessing static method), 6

**F**

fileno() (catarob.gui.termstream.TermStream method), 9  
 Filtering (class in catarob.core.filtering), 5  
 find\_height() (catarob.core.preprocessing.Preprocessing static method), 6

Fitting (class in catarob.core.fitting), 6

flush() (catarob.gui.termstream.TermStream method), 9

**H**

hex() (in module catarob.gui.progressbar), 8

**I**

incProgress() (catarob.gui.progressbar.MyAppli method), 8

**L**

load\_file() (catarob.gui.menumanager.MenuManager method), 8

**M**

MainWindow (class in catarob.gui.main), 7  
 MainWindow (class in catarob.gui.mainwindow), 7  
 MenuManager (class in catarob.gui.menumanager), 8  
 messageWritten (catarob.gui.termstream.TermStream attribute), 9  
 MyAppli (class in catarob.gui.progressbar), 8  
 MyThread (class in catarob.gui.progressbar), 8

**O**

oct() (in module catarob.gui.progressbar), 8  
 on\_actionHelp\_2\_triggered() (catarob.gui.mainwindow.MainWindow method), 7  
 on\_actionQuit\_triggered() (catarob.gui.mainwindow.MainWindow method), 7  
 on\_actionRun\_all\_2\_triggered() (catarob.gui.mainwindow.MainWindow method), 8  
 on\_actionRun\_all\_triggered() (catarob.gui.mainwindow.MainWindow method), 8  
 on\_actionSave\_current\_image\_2\_triggered() (catarob.gui.mainwindow.MainWindow method), 8  
 on\_actionSave\_current\_image\_triggered() (catarob.gui.mainwindow.MainWindow method), 8  
 on\_actionStop\_triggered() (catarob.gui.mainwindow.MainWindow method), 8

on\_actionView\_statistics\_triggered()  
     (catarob.gui.mainwindow.MainWindow  
     method), 8  
 on\_btnStart\_clicked() (catarob.gui.progressbar.MyAppli  
     method), 8  
 on\_FilterButton\_clicked()  
     (catarob.gui.mainwindow.MainWindow  
     method), 7  
 on\_OpenButton\_clicked()  
     (catarob.gui.mainwindow.MainWindow  
     method), 7  
 on\_RegisterButton\_clicked()  
     (catarob.gui.mainwindow.MainWindow  
     method), 7  
 OpenCVQImage (class in catarob.gui.menumanager), 8  
 opened() (in module catarob.core.base), 5  
 opened\_w\_error() (in module catarob.core.base), 5

## P

Preprocessing (class in catarob.core.preprocessing), 6  
 preprocessing (module), 6

## Q

qCleanupResources() (in module  
     catarob.gui.icones\_rc), 7  
 qInitResources() (in module catarob.gui.icones\_rc), 7

## R

range\_radius (catarob.core.filtering.Filtering attribute),  
     6  
 read\_metadata() (catarob.core.preprocessing.Preprocessing  
     static method), 6  
 retranslateUi() (catarob.gui.Ui\_mainwindow.Ui\_MainWindow  
     method), 7  
 run() (catarob.gui.progressbar.MyThread method), 8

## S

Segmentation (class in catarob.core.segmentation), 6  
 setupUi() (catarob.gui.Ui\_mainwindow.Ui\_MainWindow  
     method), 7  
 show\_curr\_image() (catarob.gui.mainwindow.MainWindow  
     method), 8  
 show\_curr\_metadata() (catarob.gui.mainwindow.MainWindow  
     method), 8  
 singleton() (in module catarob.core.base), 5  
 spatial\_radius (catarob.core.filtering.Filtering at-  
     tribute), 6  
 stderr() (catarob.gui.termstream.TermStream static  
     method), 9  
 stdout() (catarob.gui.termstream.TermStream static  
     method), 9  
 stdout\_redirected() (in module catarob.core.base), 5

## T

TermStream (class in catarob.gui.termstream), 9  
 typedef\_control() (in module catarob.core.base), 5

## U

Ui\_MainWindow (class in  
     catarob.gui.Ui\_mainwindow), 7  
 update() (catarob.gui.mainwindow.MainWindow  
     method), 8

## W

working\_directory() (in module catarob.core.base), 5  
 write() (catarob.gui.termstream.TermStream method), 9
